We will consider cultural and social movements as well as political and economic history, and pay particular attention to the transformative effects of cultural contact.

Course Objectives:

Students in this course will acquire a broad overview of world history. They should be able to weigh multiple factors (political, social, and economic) that cause historical change. Students should learn to consider the perspectives of different cultural groups involved in historical conflicts. They should become skilled in examining conflicting evidence, and adept in evaluating primary documents for their significance in historical context.
