

Shanghai University of Finance & Economics

2020 Summer Program

MATH 300 Multivariable Calculus

Course Outline

Term: June 1 – June 26, 2020

Class Hours: 18:00-19:50 (Monday through Friday)

Course Code: MATH 300

Instructor: Professor Vadim Olshevsky

Home Institution: University of Connecticut

Office Hours: TBA and by appointment

Email: olshevsky@gmail.com

Credit: 4

Class Hours: This course will have 52 class hours, including 38 lecture hours (including 6 excise hours), professor 8 office hours, 2-hour TA discussion sessions, 4-hour review sessions.

Course Description:

This is a third course in the calculus sequence that provides a thorough introduction to multivariable calculus. It focuses on functions of several variables, differential and integral calculus of two and three variables, and their applications, and vectors and the geometry of curves and surfaces in three dimensional space.

Course Objectives:

The goal of the course is to provide a strong foundation and mastery of calculus in two and three variables and the geometry of vectors, lines, planes, curves, and surfaces for students who intend to continue in mathematics, physics, engineering, computer science, and other quantitative disciplines such as economics and finance.

Required Textbooks:

Calculus: *Calculus: Early Transcendentals*, 8th Edition, by James Stewart with the WebAssign Access Code. Can be purchased directly at

https://www.cengage.com/c/calculus-early-transcendentals-8e-stewart/9781337771498#comparebuying-options

It is important that you purchase both the textbook and the WebAssign code, the latter is necessary for the homework assignments.

Homework:

There will be online WebAssign homework assignments for each section of the text. Each assignment will be made available on several days before the section is covered in class. The due date for each assignment will be set by your instructor and will generally be two or three days after the material is covered in class. You will get five attempts for each question.

Grading & H	Evaluation	Grade	Range 90-100
Attendance a	nd participation: 10%	А	
Homework:	30%	В	80-89
Midterm:	30%	С	70-79
Final:	<u>_30%</u>	D	60-69
		F	0-59

Course Schedule:

Week1: Introduction, vectors in three-dimension, dot and cross products, lines and planes in three dimension, implicit/parametric surfaces, curves and arc length.

Week2: Functions of several variables, limits and continuity, partial derivatives, tangents, differentiability, the chain rule, gradient and directional derivatives.

Week3: Extrema, Lagrange multipliers, and double integrals. Double, triple and line integrals

Week4:, Change of variables. Curl, Green's, Stoke, and Divergence Theorems.

Detailed Course Outline:

Week	Date	Chapter	Торіс
	06/01/2019		1.1 Introduction and notation
			1.2 Space and vectors in three-dimension

Shanghai University of Finance & Economics 中国上海市国定路777号 邮编200433 777 Guoding Road, Shanghai, 200433, China

	06/02/2019	1 Geometry, space, surfaces	1.3 Dot and cross products
1		and curves	1.4 Lines and planes in three-dimension
	06/03/2019		1.6 Implicit and parametric surfaces
	06/04/2019		1.7 Curves, arc length
	06/08/2019		2.1 Limits and continuity
			2.2 Partial derivatives
	06/09/2019	2 Differential calculus of	2.3 Tangent, planes, differentiability
2		functions of several variables	2.4 The chain rule
	06/10/2019		2.5 Gradient and directional derivatives
	06/11/2019		Exam 1
	06/15/2019		3.1 Extrema
3	06/16/2019	3 Extrema and double inte- grals	3.2 Lagrange multipliers
	06/17/2019		3.4 Double integrals over rectangles
			3.5 Double integrals over general regions
	06/18/2019	4 Triple and line integrals	4.1 Triple and line integrals
	06/22/2019		4.2 Change of variables
4	06/23/2019	5 Vector fields and integral	5.1 Curl, Green's Theorem, Flux
		Theorems	
	06/24/2019		5.2 Stoke/Divergence Theorems
	06/25/2019		Final Exam
	06/26/2018		Discussion of final exam

Student responsibilities/expectations:

The main course material will be presented through lectures. A discussion session, to be held every Friday will offer an opportunity for students to discuss course material and assigned problems with a teaching assistant (TA). Students are advised to keep pace with the course material as it is being presented. Consequently, students should endeavor to attend all class meetings and discussion sessions, be early for class, and spend sufficient time working on assigned homework problems. If for any reason a student misses a class, he/she should endeavor to obtain the notes and learn the missed material before the next class meeting. Students should not hesitate to ask questions or seek additional assistance to ensure that they are staying on pace with the class. Students will be expected to come to class prepared and ready to participate actively. Please, turn off your cell phones and put aside any unrelated material before class begins. Students should exhibit a sense of responsibility and respect towards fellow students. Late-coming to class or early departure from class meetings will not be allowed.

Examinations:

There will be one midterm exam plus one cumulative final exam. The exams will contain problems to solve and definitions, brief explanations of concepts, and simple proofs.
